Still open before construction

- **Architect:** floor-to-floor height, window sill height (assumed 2'-11⅜"), lintel and parapet heights.
- **Structural engineer (Agharkar):** the column schedule covers the stilt plus 3 floors, but the architect's drawing shows a fourth floor; please confirm. Floor beams are not yet drawn.
- **Electrical and plumbing points** for this final layout: TV sockets and data points, and the bedside and desk sockets, are to be regenerated from it (the saved model still carries Plan A).
- **Family decisions already taken:** front twins keep the bed along the window (walk-up window access fails the toilet and walkway rules); ROOM-4 hotel layout moved to ROOM-3 (ROOM-4 too small).
